INTERNATIONAL JOURNAL OF CHEMICAL KINETICS, VOL. IX, 1015–1018 (1977)

Subject Index to Vol. IX

ABSORPTION SPECTRUM, of hydrazine and hydrazine-d_4 above 200 nm (787)
ABSTRACTION, of Br atoms by I atoms from 1,1-difluorobromoethane (759)
ABSTRACTION, of Cl atoms from haloethanes by cyclohexyl radicals (55)
ABSTRACTION, of H atoms by CH_3 (693)
ABSTRACTION, of H atoms by Trichloromethyl and 1,1-Dichlorotrifluoroethyl radicals from Trichlorosilane (663)
ABSTRACTION, of Hydrogen atoms by H atoms from propene and D_2 (725)
ACCELERATION, of the neopentane pyrolysis by ClH and BrH (425)
ACETONE, reaction with $O(^3P)$ atoms (133)
ACTIVATION ENERGY, dependence on nature of heat bath gas (371); non-Arrhenius (371); non-equilibrium (371)
ADDITION, of atomic oxygen to cyclopentadiene (67); of methyl radicals to ethylene, acetylene, and benzene (185)
APPARATUS, determination of dead space in gas kinetic apparatus (503)
ARRHENIUS PARAMETERS, evaluation of (481); for $CH_3O + O_2$ (31); for decomposition of dimethyl peroxide (31)
ASSOCIATION COMPLEXES (17)
ATOM EXCHANGE, between nitrogen dioxide and carbon monoxide (887); between nitrogen dioxide and sulfur dioxide (887)
AUTOOXIDATION, of Copper (1), kinetic and mechanism (983)

BIRADICAL INTERMEDIATE (513), (525)
BOND DISSOCIATION ENERGIES, C-Br bond dissociation energy in 1,1-difluorobromoethane (759)
BOND-ENERGY, BOND-ORDER METHOD (417)

CATALYSIS, of H_2O_2 decomposition by Fe^{3+} ions (179); of hydrogen peroxide catalyzed by ferric ion (595)
CHEMICAL KINETICS, physisorbed layers (157)
CHEMICALLY ACTIVATED, 1,2-bisdifluoraminopropane, dehydrofluorination of (689)
CLAISEN REARRANGEMENT, in the gas phase (161)
COLLISIONAL ENERGY TRANSFER, calculations of (371); inefficient (371); of rotational energy (371); of vibrational energy (371)
COLLISIONAL RELEASE MECHANISM, in the NO^- and NO_2^- catalyzed decomposition of I_2 (917)
COLLISIONAL TRANSITION PROBABILITY, models of (371)
COLLISIONS, weak, in thermal reactions (371)
COMPLEX FORMATION, hydroperoxo-water and hydroperoxo-ammonia (875)
COMPUTER CALCULATIONS, for the mechanism of cerous ion oxidation by bromate ions—comparison with experiment (841)
CONSECUTIVE REACTIONS, analysis of (535)
CYCLOADDITION (513), (525)

DEAD-SPACE, determination of in gas-kinetic systems (503)
DECOMPOSITION OF BROMOACETONITRILE, cyano effect on metathetical reactions (361)

DECOMPOSITION, of diimide and diimide-d_2 (787); of dimethyl peroxide (31); of hydrogen peroxide catalyzed by ferric ion (595); of nitrogen dioxide (887); of perfluoro-di-*t*-butyl peroxide (769); of products in the reaction of atomic oxygen with cyclopentadiene (67); of 1,1,2-trifluoro-2-trifluoro-methylcyclopropane (339); of vinyl chloride (651); thermal and initiated thermal in gas phase, of biacetyl-d_6 (349)
DEHYDROFLUORINATION, of chemically-activated 1,2-bisdifluoraminopropane (689)
DE-METALLATION, of and iron (III)-porphine complex (777)
DISPROPORTIONATION/COMBINATION RATIO, for $CH_3O^{\cdot} + NO_2$ (31)
DISSOCIATION, thermodynamics of carbon diselenide (671)

ENERGY RELATIONS (525)
ENERGY TRANSFER, collisional, calculations of (371); in thermal unimolecular reactions (223); in unimolecular reactions at high temperatures (387)
ESTIMATED RATE CONSTANTS, for transfer reactions of oxygen atoms, hydrogen atoms, and hydroxyl radicals (929)

FLASH PHOTOLYSIS, used in the production of methylene radical for reaction with oxygen molecule and carbon monoxide (507); of CH_3I (693); of iodine (223); of 4-nitronaphthylamine (409)
FLOW SYSTEMS, interpretations of relaxation-rate measurements made in (235)

HEAT BATH GAS, reversal of collisional energy transfer efficiency (371)
HEAT OF FORMATION (17); 1,1-difluorobromoethane (759); of dimethylpropargyl radical (907)
HYDROGEN ABSTRACTION, by $O(^3P)$ (417)
HYDROGEN PEROXIDE, thermal dissociation, calculation of (371)

INHIBITION, of ethane pyrolysis by BrH (425)
INTERNALLY HYDROGEN-BONDED ACIDS, mechanism of reaction with general bases (1)
ISOTOPE EFFECT, calculation in the thermal unimolecular fall-off region (321); deuterium, in the hydroperoxo-water and hydroperoxo-ammonia chemical systems (875)
ISOTOPE ENRICHMENT, model of two-step photodissociation method (969)
ISOTOPE EXCHANGE, of propene and D_2 in a single-pulse shock tube (725)

KINETIC MASS SPECTROSCOPY, of CH_4, C_2H_6 formation (693)
KINETICS, of H_2O_2 decomposition by Fe^{3+} ions (179); of high-temperature pyrolysis of dimethyl ether (471); of reaction between nitrous acid and hydrogen peroxide in perchloric acid solution (629); of reaction of atomic hydrogen with methylnitrite (249)
KINETICS AND MECHANISM, of the malonic acid-iodine reaction (83)

LASER INDUCED FLUORESCENCE, interpretation of relaxation rate measurements made by this technique in flow systems (235) of DF, HF (123)
LASER RESONANCE ABSORPTION, probing technique in the vibrational population measurement of carbon monoxide produced in the reaction of methylene radical with oxygen molecule and carbon dioxide (507)
LEAST SQUARES, evaluation of Arrhenius parameters (481)

MASS SPECTROMETRIC TECHNIQUE, kinetics in physisorbed layers (157)
MATRIX ISOLATION, study of thermal oxidation of nitric oxide in solid oxygen (953)
MECHANISM, accounting for the effect of hydrogen halides upon the pyrolyses of ethane and neopentane (425); of catalytic ketonisation and esterification (641); of reaction of atomic oxygen with cyclopentadiene (67); of reaction between nitrous acid and hydrogen peroxide in perchloric acid solution (629)

MODELING, two-step photodissociation method of isotope enrichment (969)
MOLECULAR MODULATION SPECTROSCOPY, in the study of combination of methyl radicals with O_2 (451)

NANOSECOND FLASH PHOTOLYSIS, of 1,4-dinitronaphthalene (943)
NO-CATALYZED RECOMBINATION, of iodine (223)
NO_2-CATALYZED RECOMBINATION, of iodine (223)
NANOSECOND FLASH PHOTOLYSIS, of 1,2- and 1,8-Dinitronaphthalenes (399)

OXIDATION, of cerous ions by bromate ions—comparison of experimental results with computer calculations (841); of nitric oxide in solid oxygen (953); of Quinols (215)
OXIDATION KINETICS, of sulfur dioxide on titanium dioxide and nickel oxide (489)
OXYGEN ATOM, reaction with acetone (133)
OZONOLYSIS, of thiophene in the gas phase (829)

PHENOXY RADICAL, heat of formation of (161)
PHOTOLYSIS, of 1,1-dichloroethane at 147 nm (619); of 1,1,1-difluorochloroethane at 147 nm (697); (147 nm) of 1,2-fluorochloroethane (743)
PRODUCTION OF VIBRATIONALLY EXCITED OH (97)
PROTON TRANSFER, between internally hydrogen-bonded acids and general bases (1)
PULSE RADIOLYSIS AT HIGH INTENSITIES, reaction of hydrogen peroxide with pentavalent vanadium (603)
PYROLYSIS, of alkyl nitrites of ethyl nitrite (549); of alkyl nitrites (141); of 2-chloro-3-methyl butane; of pinacolyl chloride (819); of dimethyl ether, kinetics of high temperature (471); of 2,3-dimethyl-3-pentyl acetate (379); of isopropyl fluoroacetate; of isopropyl chloroacetate; of isopropyl iodoacetate (811); of methyl nitrite, of alkyl nitrites (567); of neopentane and ethane in the presence of ClH and BrH (425); of perfluoro-di-*t*-butyl peroxide (769); of 2-phenylethylamine (307); of phenyl methyl sulfide and benzyl methyl sulfide (295); of *i*-propyl nitrite (141); of trifluoroacetaldehyde, the formation of hexafluoroethane (589)

RADICAL EQUILIBRIUM, studies; the thermodynamic parameters of *n*-propyl (705)
RADIOLYSIS, of hydrogen + oxygen mixture to form hydroperoxo radical (875)
REACTION, of H-atoms with methylhydroperoxide (267); of methoxy radicals with NO_2 (31); of methoxy radicals with O_2 (31); of methoxy radicals with dimethyl peroxide (31)
REACTIVITY, of propyl radicals (725)
RELAXATION RATES, interpretation of measurements made in flow systems (235)
REVERSAL, of heat bath gas collisional energy transfer efficiencies (371)
RRKM THEORY, applied to the decomposition of chemically activated methylallylether (201)

SELF-HEATING, in thermal decomposition of diimide (787)
SHOCK TUBE, study of propene pyrolysis in the presence of D_2 (725)
SHOCK TUBES, importance of wall cooling in single-pulse experiments (863)
STABILIZATION ENERGY, of dimethylpropargyl radical (907)
STEREOCHEMISTRY (513)
STERIC EFFECTS, in the gas-phase elimination of esters (379)
SUBSTITUENT EFFECTS, in the gas-phase elimination of α-substituted alkyl chlorides (819); on Cl atoms abstraction from polychloroethanes by cyclohexyl radicals (55)

TAFT CORRELATION, in the gas-phase elimination of isopropyl α-haloacetates (811)
THERMAL DECOMPOSITION, of aromatic ethers at very low pressures (161); of diimide and diimide-d_2 (787); of iodine catalyzed by NO and NO_2 (917)
THERMAL DIMERIZATION, of 1,3-butadiene (283)
THERMAL DISSOCIATION OF HYDROGEN PEROXIDE, calculated (371)
THERMODYNAMIC PARAMETERS, of *n*-propyl (705)

THERMODYNAMIC, SPECTROSCOPIC, AND KINETICS PROPERTIES, of BrNO (867)
TRANSITION PROBABILITY, collisional, models of (371)
TRIPLET ENERGY TRANSFER, general expression for quantum yield of mono- and polyatomic donors (751)

UNIMOLECULAR DECOMPOSITION, of chemically activated methylallylether (201); of dimethyl peroxide (31)
UNIMOLECULAR FALLOFF CURVES, calculation by Forst's method (321)
UNIMOLECULAR RATE CONSTANT OF INITIATION, in the high-temperature pyrolysis of dimethyl ether (471)
UNIMOLECULAR REACTIONS, energy transfer in (387)

VERY LOW PRESSURE PYROLYSIS, of 3,3-dimethylbut-*l*-yne (907)
VIBRATION-VIBRATION, energy exchange (13)
VIBRATIONAL DEACTIVATION, of the hydroxyl radical (97)
VIBRATIONAL EXCITATION, reactions induced by (111)
VIBRATIONAL RELAXATION, deactivation of DF, HF (123)

WALL COOLING, in single-pulse shock-tube experiments (863)
WEAK COLLISION EFFECTS, in thermal reactions (371)

INTERNATIONAL JOURNAL OF CHEMICAL KINETICS, VOL. IX, 1019–1022 (1977)

Index of Compounds to Vol. IX

ACETIC ACID, ketonisation and esterification with methyl, isopropyl and benzyl alcohols over ferric oxide (641)
ACETONE (133)
ACETYLENE, addition of methyl radicals to (185)
ALIZARIN YELLOW G, reaction with general bases (1)
ALKYL NITRITES, gas-phase pyrolysis of (141); pyrolysis of (549), (567)
AMMONIA, effect on hydroperoxo self-reaction (875)
ATOMIC OXYGEN (^3P) (417); reaction with cyclopentadiene (67)
AZOMETHANE, thermal decomposition of for producing methyl radicals (349)

Br^- (17)
BENZENE, addition of methyl radicals to (185); as triplet energy donor to vinyl fluoride (751)
BENZYL METHYL SULFIDE, pyrolysis of (295)
BIACETYL-d_6, kinetics of the thermal decomposition in the gas phase of (349)
1,2-BISDIFLUORAMINOPROPANE, dehydrofluorination of chemically activated (689)
BROMATE IONS, oxidation of cerous ions by bromate ions—comparison of experimental results with computer calculations (841)
BROMOACETONITRILE, reaction with cyclohexyl radicals (361)
t-BUTYL CHLORIDE, calculation of thermal unimolecular fall-off curves (321)

CARBON DIOXIDE, reaction with methylene radical (507)
CADMIUM, as triplet energy donor to vinyl fluoride (751)
CARBON DISELENIDE, thermodynamics of dissociation (671)
CARBON MONOXIDE (13), (97); from reaction of methylene radical with oxygen molecule and carbon dioxide (507); reaction with nitrogen dioxide (887)
CEROUS IONS, oxidation by bromate ions—comparison of experimental results with computer calculations (841)
2-CHLORO-3-METHYL BUTANE, pyrolysis of (819)
CHROMIUM(III), bis(dimethylacetamido)bis(ethylenediamine), solvolysis of (535)
cis-BUTENE (513), (525)
cis-cis-CYCLOOCTA-1,5-DIENE, kinetics of the formation of from 1,3-butadiene (283)
cis-1,2-dimethylcyclobutane (513), (525)
COPPER (1), kinetic and mechanism of α,α' dipyridyle complex autooxidation (983)
CYCLOBUTANE, -d_0, -d_8, calculation of thermal unimolecular fall-off curves (321); energy transfer in unimolecular reaction of (387)
CYCLOHEXENE, energy transfer in unimolecular reaction of (387)
1,3-CYCLOPENTADIENE, reaction with atomic oxygen (67)
CYCLOPROPANE, -d_0, -d_6, calculation of thermal unimolecular fall-off curves (321); energy transfer in unimolecular reaction of (387); pyrolysis in shock tube (863)

DEUTERIUM FLUORIDE (123)
DIAZENE, diazene-d_2, kinetics and stoichiometry of decomposition (787)
1,1-DICHLOROCYCLOPROPANE, calculation of thermal unimolecular fall-off curves (321)
1,1-DICHLOROETHANE, reaction with cyclohexyl radicals (55)
1,1-DICHLOROETHANE, vacuum-uv photolysis of (619)
1,2-DICHLOROETHANE, reaction with cyclohexyl radicals (55)

1,1-DIFLUOROBROMOETHANE, kinetics and thermochemistry of reaction with I_2 (759)
1,1,1-DIFLUOROCHLORETHANE, 147 nm photolysis of (697)
1,1-DIFLUOROETHANE, calculation of thermal unimolecular fall-off curves (321)
1,1-DIFLUOROIODOETHANE, thermochemistry of, in reaction of 1,1-difluorobromoethane with I_2 (759)
DIIMIDE, diimide-d_2, kinetics and stoichiometry of decomposition (787)
3,3-DIMETHYLBUT-*1*-YNE, very low-pressure pyrolysis of (907)
DIMETHYL ETHER, kinetics of the high-temperature pyrolysis of (471)
DIMETHYLPROPARGYL RADICAL, heat of formation of, stabilization energy of (907)
2,3-DIMETHYL-2-PENTENE, product of pyrolysis of 2,3-dimethyl-3-pentyl acetate (379)
3,4-DIMETHYL-*cis*-2-PENTENE, product of pyrolysis of 2,3-dimethyl-3-pentyl acetate (379)
3,4-DIMETHYL-*trans*-2-PENTENE, product of pyrolysis of 2,3-dimethyl-3-pentyl acetate (379)
2,3-DIMETHYL-3-PENTYL ACETATE, pyrolysis of (379)
DIMETHYL PEROXIDE, unimolecular decomposition of (31)
1,2- and 1,8-DINITRONAPHTHALENES, triplet excited states (399); spectroscopy and reactivity (399)

ETHANE (693); influences of ClH and BrH on the pyrolysis of (425)
ETHOXY BENZENE (161)
ETHYL CHLORIDE, -d_0, -d_2, -d_5, calculation of thermal unimolecular falloff curves (321)
2-ETHYL-3-METHYL-1-BUTENE, product of pyrolysis of 2,3-dimethyl-3-pentyl acetate (379)
ETHYL NITRITE, pyrolysis of (549)
ETHYLENE (513), (525); addition of methyl radicals to (185)

FERRIC ION, as catalyst in the decomposition of H_2O_2 (179)
1,2-FLUOROCHLOROETHANE, vacuum-uv photolysis of (743)

HBr (17)
HNO_3 (17)
H-ATOM, reaction with methylhydroperoxide (267); reaction with methyl nitrite (249)
HYDROGEN (371)
HYDROGEN ATOMS, addition to propene (725); estimated rate constants for transfer reactions of (929)
HYDROGEN BROMIDE (97), (111); influence on the pyrolyses of C_2H_6 and neo C_5H_{12} (425); model of two-step photodissociation (969)
HYDROGEN CHLORIDE, influence on the pyrolyses of C_2H_6 and neo C_5H_{12} (425)
HYDROGEN FLUORIDE (123)
HYDROGEN PEROXIDE (371); decomposition by Fe^{3+} ions (179); ferric-ion catalyzed decomposition of (595); reaction with nitrous acid (629); reaction with pentavalent vanadium studied by high-intensity pulse radiolysis (603)
HYDROPEROXO, self-reaction and complex formation (875)
HYDROXYL RADICAL (97), (111); estimated rate constants for transfer reactions of (929)

IODINE (223); kinetics of the reaction with malonic acid (83); NO^- and NO_2^- catalyzed decomposition of (917)
IRON (III), phenanthrolines complexes (215)
ISOPROPYL CHLOROACETATE, pyrolysis of (811)
ISOPROPYL FLUOROACETATE, pyrolysis of (811)
ISOPROPYL IODOACETATE, pyrolysis of (811)

MALONIC ACID, kinetics of the reaction with iodine (83)
METHANE (693)

α-METHOXY BENZENE (161)
METHOXY RADICALS, reactions with dimethyl peroxide, NO_2, and O_2 (31)
METHYLALLYLETHER (201)
METHYLHYDROPEROXIDE, reaction of H-atoms with (267)
METHYL NITRITE, pyrolysis of (567); reaction with H-atom (249)
METHYL IODIDE (693)
METHYL RADICAL (693); addition to ethylene, acetylene, and benzene (185); reaction with oxygen to produce methyl peroxy radical (451)
METHYLENE RADICAL, reaction with oxygen molecule and carbon dioxide (507)

NO_3^- (17)
NEOPENTANE, influences of ClH and BrH on the pyrolysis of (425)
NITRIC OXIDE, reaction with solid oxygen (953)
4-NITRO-N,N-DIMETHYLNAPHTHYLAMINE, triplet excited state, spectroscopy, and reactivity (943)
NITROGEN DIOXIDE, decomposition (887); disproportionation/combination with CH_3O (31); reaction with carbon monoxide (887); reaction with sulfur dioxide (887)
4-NITRONAPHTHYLAMINE, triplet excited state (409); intersystem crossing (409); spectroscopy (409); reactivity (409)
NITROSYLIODIDE (223); in the NO-catalyzed decomposition of iodine (917)
NITROSYL BROMIDE, thermodynamic properties, UV/Vis spectrum and kinetics (867)
NITROUS ACID, reaction with hydrogen peroxide (629)
NITROUS OXIDE (13)
NITRYLIODIDE (223); in the NO_2-catalyzed decomposition of iodine (917)

$O(^3P)$ ATOMS (133)
OXETAN, calculation of thermal unimolecular fall-off curves (321)
OXYGEN, reaction with CH_3O (31); complexes with copper (1) (983)
OXYGEN ATOMS (97), (111); estimated rate constants for transfer reactions of (929)
OXYGEN MOLECULE, reaction with methylene radical (507)
OZONE, reaction with thiophene (829)

PERFLUORO-di-*t*-BUTYL PEROXIDE (769)
2-PHENYLETHYLAMINE, pyrolysis of (307)
PHENYL METHYL SULFIDE, pyrolysis of (295)
PINACOLYL CHLORIDE, pyrolysis of (819)
PROPENE, decomposition in shock waves (725)
2-PROPENYLOXY BENZENE (161)
n-PROPYL, the thermodynamic parameters of (705)
i-PROPYL CHLORIDE, calculation of thermal unimolecular fall-off curves (321)
i-PROPYL NITRITE, gas-phase pyrolysis of (141)
PROPYL RADICALS, the decomposition of (725)

QUINOLS (215)

SULFUR DIOXIDE, kinetics and mechanism of oxidation on titanium dioxide and nickel oxide (489); reaction with nitrogen dioxide (887)
SULFUR MOLECULES, kinetics of formation (157)

THIOPHENE, reaction with ozone (829)
Trans-BUTENE-2 (513), (525)
Trans-1,2-DIMETHYLCYCLOBUTANE (513), (525)
1,1,2-TRICHLOROETHANE, reaction with cyclohexyl radicals (55)

TRICHLOROSILANE, abstraction of H-atoms from (663)
TRIFLUOROACETALDEHYDE, pyrolysis of, and the formation of hexafluoroethane (589)
1,1,2-TRIFLUORO-2-TRIFLUOROMETHYLCYCLOPROPANE, gas-phase thermal decomposition (339)
TROPAEOLIN O, reaction with general bases (1)

VINYL CHLORIDE, thermal gas-phase decomposition of (651)
VINYL FLUORIDE, as triplet energy acceptor (751)

WATER, effect on hydroperoxo self-reaction (875)

INDEX
